

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

The Ride-On Regauge Adzer is utilized for adzing ties on re-gauge projects utilizing a high-speed 1-7/16" mill type cutter.

Applications

Specifically designed for Curve Gangs where re-gauging rail is only required.

Precise Cut Positioning

Uses proportional controls for precise placement of the Workhead. Workhead traverses side to side or up and down. Equipped with a laser to project the cutting pattern onto the ties for more accurate cuts.

Cuts Either Rail Seat

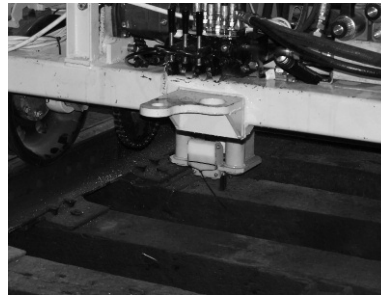

The workhead has full latitude run to adz either rail seat without having to turn the machine around.

Excellent Visibility

Workhead resides in a large open area for better visibility. Plexiglas barrier prevents wood chips and rock from entering the cab.

Lightweight

At just 5,800 lbs, the machine can easily be moved on/off track by a speed swing, excavator or front end loader.

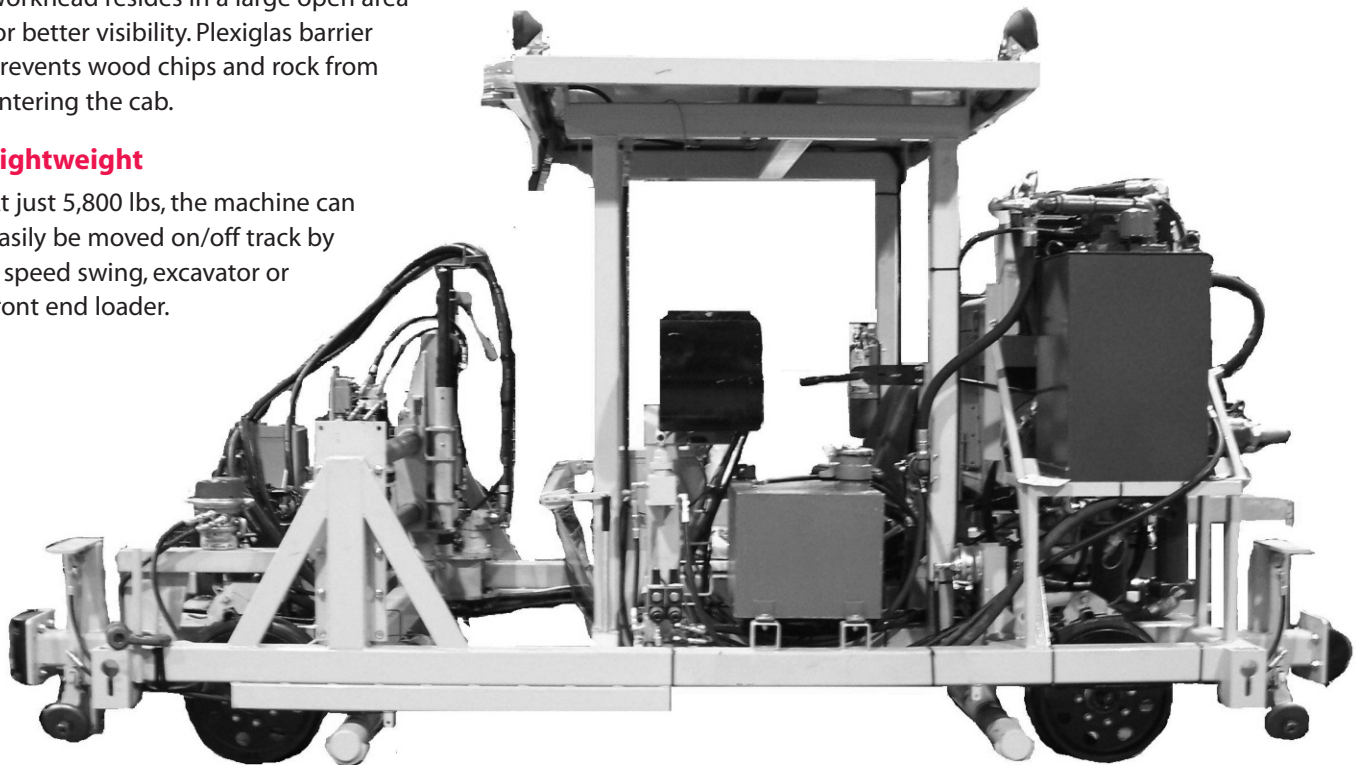

Adzer workhead

Excellent visibility

PRODUCT SPECIFICATIONS:

- Engine: Hatz 2L41C Diesel
- Fuel capacity: 15 gal
- Hydraulic capacity: 25 gal
- Dimensions: 157" L x 85" W x 88" H, 5,800 lbs
