

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

### Powerful and Lightweight

Equipped with the 1.3 HP Tanaka 2-cycle engine, the drill delivers plenty of drilling power. Weighing only 16 lbs, it will reduce operator fatigue. Forward and reverse settings for easy bit removal. 1/2" capacity drill chuck included.

### Ergonomically Designed

Well balanced for easy operation. The rollbars not only protects the engine and components from damage, but doubles as easy handholds for operator flexibility and comfort.

### Protection From Damage

Rollbars and skid plate protect the fuel tank, engine and carburetor from damage.

**The Racine Gasoline Tie Drill is designed to pre-drill holes in wood ties for lag screws, bridge timber screws and crossing projects.**
