

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Fast Drilling and Superior Hole Quality

The Racine High Speed Gas Rail Drill can drill up to 30 holes in 132 lb standard carbon rail. Each hole takes less than 20 seconds to drill. The integral arbor support guarantees hole tolerance. Superior clamp design and custom rail shoes reduce the risk of drill movement during operation which can cause cutter breakage. Easily drill through raised rail web lettering without breakage, a common problem with the competition.

No Mixing of Fuel & Oil

Powered by a 4-cycle, 50 cc Honda engine. No mixing means less maintenance and repairs due to improper fuel/oil mix.

Lightweight

Weighing only 43 lbs, it's lighter than most gasoline and hydraulic rail drills.

Drill Accessories

Coolant bottle, rail shoes tool kit and cutter are included with each drill. Index bars and rail shoes are available for most rail and crane rail profiles. Able to drill 1" to 1 1/2" hole diameters. Convenient storage compartment on the side of drill for rail cutters.

Model 910068	
Engine	2.5 Honda, 4-cycle
Engine Displacement	50 cc
Weight	43 lbs. 19.5 kg
Drilling range	1 to 1 1/2" hole diameter
Included: coolant bottle, rail shoes tool kit and cutter	
Options: storage box, crane rail clamp	
Inquire on rail sizes and drilling index bars
