

AM3 Anchor Applicator

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

The AM3 Anchor Applicator is an HVAC cab-equipped anchor applicator designed to apply rail anchors with one operator on one rail.

Excellent Visibility

The AM3 Anchor Applicator offers excellent operator visibility of the work zone.

The operator has the ability to see upcoming ties that need work, decreasing the chance of missing ties, thus increasing productivity, and reducing wear on the machine travel components.

Easy Set-up and Operation

MD4 control technology allow adjustments for various rail sizes to be made inside the cab, no more “wrench in hand” adjustments. Tooling is available for most modern day anchor types.

Faster Cycle Times

The programmable MD4-controlled automation has significantly faster cycle times than previous Racine machines.

Independent Work Arms

AM3 Anchor Applicator can apply a single anchor left or right of the tie when a single anchor is missing.

Innovative Technology

- Advance load-sense pump controls allow for NON-DEF engine power.
- Easy touchscreen controls with workhead adjustments are made from the operator seat.
- Onboard electrical system diagnostics that simplify troubleshooting and lessen downtime.
- Remote program updates and remote troubleshooting with built-in telematics available.
- Compatible with: Unit 5, Unit Spring, Improved Fair, and Viper Anchors.

Specifications

Dimensions: 22'L x 8'W x 9' 9"H

Weight: 16,000 lbs

Travel Speed: 24 MPH

Cab: Enclosed Heat & A/C, full ergonomic seat, tinted safety glass

Engine: 74 HP Cummings 2.8L Tier IV liquid cooled engine requiring no DEF

Fuel Capacity: 54 Gallons

HYD Reservoir: 34 Gallons
