

Advanced Tie Plate Inserter

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Improved Visibility

The machine offers improved excellent operator visibility of the work zone, increasing productivity and reducing wear on the machine travel components. The machine also has excellent visibility fore and aft when track traveling. The workhead has been moved forward from previous machine models, further improving operator visibility and allowing easier access to workhead components for routine maintenance.

Easy Set-up and Operation - Reliable Service

Upgraded Parker MD4 touch screen controls for easier workhead adjustments and troubleshooting diagnostics. This feature will allow the operator to make workhead adjustments and diagnostics from inside the cab, saving time while keeping the operator in a safe environment. Proven reliable workhead design provides years of trouble free service.

Faster Cycle Times

Programmable MD4 controlled automation has significantly faster cycle times than previous Racine machines, possibly eliminating one machine from the gang and adding value to the railroad by reducing labor and maintenance costs. It also features a fully automatic plate insert program to simultaneously insert both plates with one trigger. This feature increases production and reduces operator wrist fatigue as compared to the more manual method in past machine models.

For a complete list of specifications and machine options available, contact Racine Railroad Products, Inc. at:

1955 Norwood Court • Mount Pleasant, Wisconsin 53403

OTHER FEATURES:

- Enclosed cab with HVAC system
- Parker MD4 controls have faster / smoother cycles for higher production and less wear
- Equipped with a center "H" Frame turntable that sets on the rails to turn the machine around
- Excellent accessibility to workhead components to perform routine maintenance

SPECIFICATIONS:

- Travel Speed: 25 mph
- Cab: Enclosed heat and a/c, full ergonomic seat
- Engine: We offer a variety of engine packages to choose from
- Seating Cap: Multiple cab sizes available (one operator, up to four passengers)
- Dimensions:
22' 3" L x 8' 6" W x 10' H
Weight: 22,500 lbs
