

Dual e-Clip Applicator / Remover

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

The Racine Dual e-Clip Applicator / Remover is a dual workhead machine designed to apply either (4) pre-set clips (both rails) or (2) pre-set clips (either rail), or remove e-Clips (one or two rails) with one operator in a fully enclosed HVAC equipped cab.

Now Applies and REMOVES Clips!

New workhead design allows the workhead to now remove clips with a simple tooling change, a great labor saver for de-stressing operations.

Versatility

The machine is based off the Racine GEN4 platform, which has the ability to accept several different workhead configurations (sold separately):

- DAA - To squeeze anchors
- DAS - Tie-out spreader
- DASP - Can squeeze or spread (tie-in or tie-out) with quick tooling changes
- ECAR - To apply or remove e-Clips

Excellent Visibility = Higher Production

The machine offers excellent operator visibility of the work zone, with the ability to see upcoming ties that need to be worked without overshooting them, increasing productivity and reducing wear on the machine travel components. The machine also has excellent un-obstructed operator visibility fore and aft when track traveling.

Faster Cycle Times

Programmable MD4 controlled automation has significantly faster cycle times than previous Racine machines while lessening operator fatigue.

Controls

The machine utilizes two joysticks to control each workhead independently through the machine's MD4 control module in manual mode. The MD4 control system can also be utilized to help troubleshoot machine maintenance issues.

Dual e-Clip Applicator / Remover

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

PRODUCT SPECIFICATIONS:

- Cab: Enclosed heat and a/c, full ergonomic seat with joystick controls
- Travel Speed: 30 mph
- Dimensions:
22' 7" L x 8' 5" W x 10' 2" H
Weight: 22,000 lbs

OTHER FEATURES:

- Fully enclosed cab with climatic a/c and heat controls for operator comfort
- Equipped with a center "H" Frame turntable that sets on the rails to turn the machine around
- Excellent accessibility to workhead components to perform routine maintenance
- Seating capacity for three (one operator + two passengers)
- We offer a variety of engine packages to choose from

Operator station with ergonomic seat and joystick controls.

Close up of workhead (Raised position).

Camera screen to view the field clips during apply / remove operation.

Clear view of the work-zone from the operator's seat.

Front view.

Rear view.
