

Dual Anchor Spreader

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Selective Automatic Or Manual Operation For Any Conditions

Automatically spread two anchors on one rail, or four anchors on two rails to pre-determined width via adjustable stops. Manually spread one anchor on one rail or two anchors on two rails for skewed tie conditions.

Quality Parts For Greater Overall Economy

Fewer wear surfaces, plus heat treated push tools lead to lower maintenance costs. Many components are interchangeable with the Dual Anchor Adjuster.

Multiple Rail Size Accommodation

Easy access to optional wide push tools insures quick changeout for either 5", 5 1/2", or 6" rails. In addition, simple adjustments align the work head to accommodate rail height.

Operator Safety

Excellent visibility insures positive alignment and repositioning of anchors by a single operator. Safety is enhanced through the use of electric powered controls that reduce operator fatigue. Side egress optimizes safe operator exit in congested areas. Workhead barriers cover exposed areas.

Increased Productivity

The Racine Dual Anchor Spreader will spread all types of rail anchors when utilized in a wood tie replacement gang. Rail anchors do not have to be removed and reapplied during this operation when the Spreader is used in conjunction with the Racine Dual Anchor Adjuster. The result is increased productivity and longer rail anchor life.

Dual Anchor Spreader

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Anchors are spread to a pre-determined width and do not have to be removed then reapplied saving time and anchor replacement costs.

Comfortable climate controlled cab design features electronic console with joystick workhead controls.

PRODUCT SPECIFICATIONS:

- We offer a variety of engine packages to choose from
- Structural steel frame with derail skids, key hole tie downs, rubber bumpers
- Cast steel wheels for long wear, self aligning roller bearings and axle locks for safe operation
- Propulsion is chain driven with a travel speed of 30 mph
- 24 VDC negative ground with a 60 amp system fuse, using a SAE #4D battery. Circuit breakers for lights and accessories
- 37 gallon hydraulic reservoir with clean out covers, guarded fluid level and temperature gauge
- 50 gallon fuel tank with 2" diameter fill neck, bottom sump and mechanical fluid level gauge
- Dimensions:

Enclosed cab: 22' L x 8' 5" W x 10' 2" H

Weight: 21,500 lbs
