INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Lightweight, compact, easy to operate.

Annular broaching cutters available in sizes 1" to 1 1/2" diameter.

Model 910069	
Motor	110 VAC
Drilling range	1 to 1 1/2" hole diameter
Included	Carry case, pump bottle, and tool kit
Weight	35 lbs 15.8 kg
Inquire on rail sizes and drilling index bars	

Fast Drilling and Superior Hole Quality

The Racine High Speed Electric Rail Drill can drill up to 30 holes in 132 lbs standard carbon rail. Each hole takes less than 20 seconds to drill. The integral arbor support guarantees hole tolerance. Superior clamp design and custom rail shoes reduce the risk of drill movement during operation which can cause cutter breakage. Easily drill through raised rail web lettering without breakage, a common problem with the competition.

Powerful and Lightweight

The 110 VAC motor provides optimum speed (250 rpm) for quick drilling of holes. At 35 lbs, it's one of the lightest rail drills in the industry.

Drill Accessories

Durable metal carry case, tool kit and coolant bottle are included with every drill. Index bars and rail shoes available for most railroad and crane rail profiles. Able to drill 1" to 1 1/2" hole diameters.
