

SprintSaw

HYD

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Model 910154

Circuit	10 GPM @ 2000 psi 38 LPM @ 138 bar
Length	40 in. 98 cm
Width (without rail clamp)	17 in. 41.7 cm
Height	17 in. 41.7 cm
Weight (without rail clamp)	40 lbs 18.8 kg

Fastest Hydraulic Rail Saw in the Market

The Racine SprintSaw will provide gasoline type performance by cutting 132 lbs rail in less than 1^{1/2} min. This is accomplished by utilizing a cog-belt driven design to produce proper 16" abrasive wheel speed to optimize rail cutting and lessen the chance of wheel "glazing", not available with other hydraulic models.

Flip Over Feature

The SprintSaw can be flipped over without removing from the rail clamp to allow the operator to finish a cut from the other side, reducing cost by extending blade life.

Ergonomically Well Balanced

Unlike other hydraulic saws, the SprintSaw's 10 GPM @ 2000 psi hydraulic motor is located near the pivot point for ease of cutting. Adjustable 3-position assist handle for operator comfort. Spring assist rail clamp assembly helps carry the weight of the saw when cutting to lessen back fatigue. Assist handle can be adjusted for left or right-handed operators.

Safety Features

Over-speed valve protects the motor and blade from excessive rpm. Convenient handle with trigger that automatically stops the tool when released. Safety trigger lock to avoid unplanned operation. Wheel guard to deflect sparks away from the operator.
