

Trak-Pak 3 - Hydraulic Power Unit

HYD

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Shown here with optional wheel kit

Designed specifically for the railroad industry, Racine Trak-Pak 3 is a heavy-duty hydraulic power unit that offers 5 or 10 GPM flow.

Heavy Duty

The Trak-Pak 3 is equipped with a 22 hp Honda GX-690 electric start four cycle engine that offers 22% more horse power than other power units on the market. It offers a large 9-gallon hydraulic reservoir and heavy duty oil cooler with thermostatic electric fan to maintain a low hydraulic oil temperature, which will increase tool performance and extend the life of your tools. A heavy gauge steel frame, roll cage and lifting bale are standard for protection of components and easy maneuvering. The large muffler offers excellent sound suppression for a quieter and safer work environment.

Easy Serviceability

The Trak-Pak 3 comes standard with a combination digital engine hour meter / engine tachometer and hydraulic oil level. Its open design allows easy access to all components including a large hydraulic tank clean out.
