

TRAK KUT II 16" Turn-around Gas Saw

GAS

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

Turn Around Feature

The Trak Kut II rail saw is equipped with a "turn around" feature that allows the operator to finish a cut without removing the rail clamp, reducing cost by extending blade life.

Less Operator Fatigue

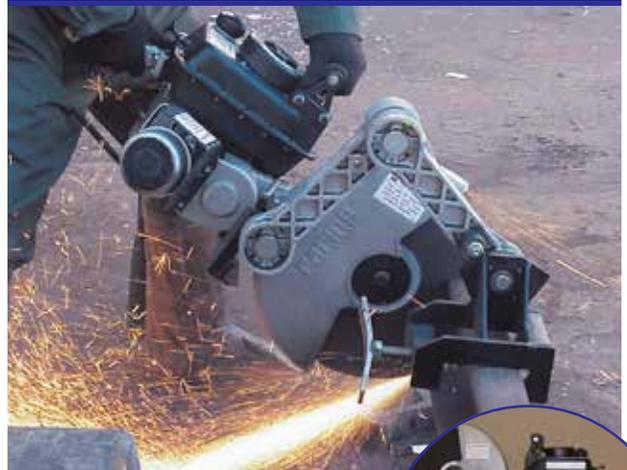

The rugged Trak Kut II saw rests on a heavy-duty pivot pin, which supports its weight during the cutting operation. The operator has the freedom to oscillate the powerhead vertically with minimum effort and maximum efficiency.

Economical, Powerful and Reliable

The Trak Kut II is one of the most economically priced saws on the market today. Powered by the US Motor Power 134 cc, 2-cycle engine, the Trak Kut II is able to cut through 132 lbs rail in less than 90 seconds. With over 30 years of manufacturing, the Trak Kut series has been a staple in the industry, with thousands of units working consistently in the field.

Other Features

Three stage dry air filtration and protective safety guards. Capable of sawing 40-175 lbs rail (including crane rail) with optional attachments.

The Racine Trak Kut II Turn-around Rail Saw is designed for cutting rail using a 16" abrasive wheel.

Trak Kut II with standard accessories and optional steel storage box.

Model 910084	
Engine	US Motor Power Model 82042 industrial 2-cycle solid-state air-cooled engine
