

INNOVATIVE DESIGN FROM RACINE RAILROAD PRODUCTS

## One tool. Two attachments. Many uses!

### Versatile

This utility grinder comes equipped with 2 grinding attachments.

- The 6" grinding wheel is used for grinding the rail web in signal applications, cleaning up rail overflow, de-burring rail ends and removing excess material from rail welds.
- The bull nose stone is used for chamfering holes in newly drilled rail to prevent the risk of rail cracking caused by stress points. A drilled hole can be chamfered in less than 10 seconds

### Easy Handling

Weighing only 15 lbs the "Feather-light" ergonomic design helps reduce operator fatigue.

### Protection From Damage

Skid plate protects engine and fuel tank from damage and ensures proper storage. Sturdy roll bar protects machine components.

### Parts and Service Readily Available

Dependable Racine Customer Service provides parts shipments, in most cases within 24 hours.
